SPECIFICATION ITEMS

ROOFINGS

Roofing made of handmade sand-faced perforated blocks of the following size (*).....,

(**)..... colour. Perforated blocks made with a mix of Romagna's alluvial clay moulded in appropriate wooden caissons and left to dry for at least 70 hours and then baked in a Hoffman kiln at a temperature of at least 1030°C. Joined with natural hydraulic mortar with a low content of soluble salts and positioned on the scantling with an overlapping of at least 2 cm per side. Joints must be pointed, smoothed and brushed according to the works management's instructions, following the specific indications for a correct laying. The roof must be completed with a concrete footing and an arc-welded net. The price includes the charges for the removal of mortar residues from the surface. The price also includes specific charges, such as transport, storage, selection, scaffolding and anything else required for a workmanlike work.

Total sqm.....

(*) See enclosed catalogue item: Flat tiles

(**) light classic sand-faced, rosy classic sand-faced, Romagna's yellow,
Romagna's light pink, antiqued.
